

Understanding Mathematics: From Counting to Calculus

By Keith Kressin

Table of Contents

Chapter 1 - Introduction

- 1-1 Why Anyone Needs This Math Book
- 1-2 What This Book Provides
- 1-3 The Layout of This Text
- 1-4 Who Would Benefit from This Book
- 1-5 Why Buy One Book that Contains 12 Years of Mathematics?
- 1-6 This Math is Really Used in Practice
- 1-7 What the Reader Should Already Know

Chapter 2 - Numbers

- 2-1 The Definition of a Number
- 2-2 Numbers are Universal
- 2-3 Counting
- 2-4 Naming Digits
- 2-5 Decimals
- 2-6 Common Symbols
- 2-7 Summary of Numbers

Chapter 3 - Addition and Subtraction

- 3-1 Explaining Addition
- 3-2 Addition of Single Digit Integers
- 3-3 Commutative Law of Addition
- 3-4 Understanding Variables
- 3-5 Associative Law of Addition
- 3-6 Explaining Subtraction
- 3-7 Subtraction of Single Digit Integers
- 3-8 Absolute Values
- 3-9 Addition and Subtraction are Complementary
- 3-10 Addition of Multi-Digit Integers
- 3-11 Separating Multi-Digit Numbers for Addition
- 3-12 Adding Decimals
- 3-13 Subtraction of Multi-Digit Integers
- 3-14 Subtraction Resulting in Negative Answers
- 3-15 Subtracting Decimals
- 3-16 Summary of Addition and Subtraction

Chapter 4 - Multiplication and Division

- 4-1 Explaining Multiplication
- 4-2 Operators for Multiplication
- 4-3 Multiplication of Single Digit Integers
- 4-4 Commutative Law of Multiplication
- 4-5 Associative Law of Multiplication
- 4-6 Distributive Law of Multiplication
- 4-7 Variations of the Distributive Law of Multiplication
- 4-8 Multiplication of Multi-Digit Integers
- 4-9 Separating Multi-Digit Numbers for Multiplication
- 4-10 Explaining Division

- 4-11 Division of Single Digit Integers
- 4-12 Division of Multi-Digit Numbers
- 4-13 Separating Multi-Digit Numbers for Division
- 4-14 Division with Remainders
- 4-15 Multiplying Decimals
- 4-16 Dividing Decimals
- 4-17 Rounding and Truncation
- 4-18 A Pause for Congrats!

Chapter 5 - Fractions

- 5-1 Defining Fractions
- 5-2 Reading Fractions
- 5-3 Types of Fractions
- 5-4 Converting Fractions to Decimals
- 5-5 Converting Decimals to Fractions
- 5-6 Multiplying Fractions
- 5-7 Making Different but Equal Fractions
- 5-8 Simplifying Fractions with Factorization and Cancellation
- 5-9 Prime Numbers
- 5-10 Prime Factorization
- 5-11 Reducing Fractions to Lowest Terms
- 5-12 Lowest Common Denominators (LCD)
- 5-13 Adding and Subtracting Fractions
- 5-14 Conversion of Mixed Numbers
- 5-15 Dividing Fractions
- 5-16 Summary of Fraction

Chapter 6 - Percentages

- 6-1 Defining Percentages
- 6-2 Operations using Percentages
- 6-3 Finding the Percentage of a Number
- 6-4 Percentages Shortcuts
- 6-5 Mean, Median, and Mode
- 6-6 Summary of Percentages

Chapter 7 - Negative Numbers

- 7-1 Defining Negative Numbers
- 7-2 Negative Numbers are Necessary
- 7-3 Addition and Subtraction with Negative Numbers
- 7-4 Multiplying and Dividing Negative Numbers
- 7-5 Performing Operations with More than 3 Numbers
- 7-6 Summary of Negative Number Operations

Chapter 8 - Exponents

- 8-1 Defining Exponents
- 8-2 Multiplying with Positive Exponents
- 8-3 Using Negative Exponents
- 8-4 More Rules for Using Exponents
- 8-5 Summary of Exponential Rules

8-6 Fractional Exponents
8-7 Scientific and Exponential Notation
8-8 Summary of Exponents

Chapter 9 - Pre-Algebra

9-1 Review of the Past and Goals for the Future
9-2 Definitions for Algebra
9-3 Operations with Variables
9-4 Order of Operations
9-5 Summary

Chapter 10 - Solving One Algebraic Equation

10-1 Introduction
10-2 Algebraic Definitions
10-3 Two Basic Methods for Solving An Algebraic Equation
10-4 Isolating the Variable
10-5 Factorization of Quadratic Equations by Inspection
10-6 Factorization Using the Quadratic Formula
10-7 Factorization of Higher Order Polynomials
10-8 Reducing an Algebraic Expression to Lowest Terms
10-9 Reducing Algebraic Equations Containing Absolute Values
10-10 Summary

Chapter 11 - Solving a System of Equations

11-1 Introduction
11-2 Substitution of Equations
11-3 Elimination of Variables
11-4 Using Matrices
11-5 Solving Systems with Matrix Reduction
11-6 Solving Systems with Cramer's Rule
11-7 Summary

Chapter 12 - Word Problems

12-1 Introduction
12-2 Steps to Solving Any Word Problem
12-3 Word Problem Examples
12-4 Summary

Chapter 13 - Functions

13-1 Introduction
13-2 Explaining Functions
13-3 Dependent and Independent Variables
13-4 Examples Using Functions
13-5 Inverse Functions
13-6 Summary

Chapter 14 - Graphing

14-1 Introduction
14-2 Plotting Points on the Cartesian Coordinate System
14-3 Plotting Linear Equations
14-4 Plotting Systems of Linear Equations

14-5 Plotting Quadratic Equations
14-6 Plotting Polynomials of Higher Degrees
14-7 Plotting Polynomials with Multiple Variables
14-8 Summary of Graphing

Chapter 15 - Geometry

15-1 Introduction
15-2 Lines and Angles
15-3 Triangles
15-4 Congruent Triangles
15-5 Polygons
15-6 Circles
15-7 Summary

Chapter 16 - Measurement of Geometric Figures

16-1 Introduction
16-2 Lengths, Perimeters and Areas of Polygons
16-3 Circle Measurements
16-4 Volumes and Surface Areas
16-5 Summary

Chapter 17 - Trigonometry

17-1 Introduction
17-2 Trigonometric Functions
17-3 Commonly Used Triangles
17-4 Oblique Triangle Relationships
17-5 Trigonometry and Graphing
17-6 Plotting Sine and Cosine Values
17-7 Using Radians
17-8 Summary

Chapter 18 - Logarithms

18-1 Introduction
18-2 Understanding Logarithms
18-3 Calculating Logarithms
18-4 Uses of Logarithms
18-5 Finding the Natural Logarithm
18-6 Summary

Chapter 19 - Complex Numbers

19-1 Introduction
19-2 Defining Imaginary Numbers
19-3 Adding and Subtracting Imaginary Numbers
19-4 Complex = Real + Imaginary
19-5 Graphing Complex Numbers
19-6 Summary

Chapter 20 - Finding Geometry Using Algebra

20-1 Introduction
20-2 Finding Geometry with Complex Exponents
20-3 Using Complex Exponents
20-4 Summary

Chapter 21 - Introducing Calculus

- 21-1 What More is There to Learn?
- 21-2 An Essential Introduction to Calculus
- 21-3 Summary of the Introduction

Chapter 22 - The Derivative

- 22-1 Introduction
- 22-2 Development of the Derivative Using Limits
- 22-3 Usefulness of the Derivative
- 22-4 Finding the Derivative of a Function
- 22-5 Derivatives of Special Functions
- 22-6 The Chain Rule
- 22-7 L'Hopital's Rule
- 22-8 Maxima and Minima
- 22-9 Newton's Method
- 22-10 Summary of Derivatives

Chapter 23 - The Integral

- 23-1 Introduction
- 23-2 Development of the Integral Using Limits
- 23-3 Finding the Integral from the Derivative
- 23-4 Solving Integrals
- 23-5 Summary of Integrals

Chapter 24 - A Final Word on Mathematics

- 24-1 How Computers and Calculators Understand Math
- 24-2 Continued Learning
- 24-3 Now What?

Appendix A: Trigonometric Identities**Appendix B: Table of Trigonometric Functions**
